Communications

This is the new and improved Control Panel. It is very much still there, but it is no longer ever-present.

n-wide Message

Missouri State Emergency Management System 8!

This will walk you through anything that changed from the old Control Panel to the new Control Panel. Keep in mind some of the changes include features that used to be a part of the Control Panel but have been moved elsewhere on the screen.

- 1) **How do I even open the Control Panel now?!**: To access the Control Panel simply click on the aka the “Hamburger Icon” in the upper left hand corner. As you can see it retains it familiar form.
- 2) **New Information in Boards**: On the old Control Panel, boards with new information were indicated by being highlighted red. Now boards with new information are indicated by the icon. This icon also appears on the board tab at the top if the board is open.
- 3) **But what if I want to have my boards not in Tabs?!**: Don’t worry, by clicking on the icon you will be able to have the selected board in a separate window (that updates independent of the tab so no more worries about missed information)
- 4) **User Information**: To update any of your user information click on your username displayed at the top left hand corner of the screen. This will bring up a pop up screen that will allow you to update your user information.
- 5) **Switching Position and Incidents**: On the old Control Panel to change the position and/or incident you had to click on a hyperlink. With the new Control Panel the incident and position are clearly marked at the very top of the screen and require nothing more than the use of a drop down menu to change.

*****IMPORTANT NOTE*****

DO NOT REFRESH THE PAGE, YOU WILL BE LOGGED OFF!

Similar to closing the Control Panel in the previous version, refreshing the page will log you out.

The New Tab System and Notifications

System-wide Message
The Missouri State Emergency Management Agency Welcomes You to the New and Improved WebEOC Version 8!

shgxcf@mail.missouri.edu
SEMA

5 New Message: Welcome to the New WebEOC 15:53

6 New Message: Welcome to the New WebEOC

With WebEOC Version 8 one of the most noticeable changes is the “Tab System.” Where previously Boards opened in their own windows they now open in a series of tabs across the top of your screen expanding your “Screen Real Estate” and streamlining the end user experience. WebEOC Version 8 has also continued to improve the notification mechanisms for WebEOC. Any notification mechanism that you were familiar with on the previous version has a parallel in the new version.

- 1) **The Control Panel:** By clicking on the  (aka The Hamburger Icon) in the upper left hand corner.
- 2) **The Home Tab:** This is where you will see “System-wide Messages” which are important messages disseminated from WebEOC Administrators and receive notifications such as new messages.

- 3) **The Tabs:** Boards that are opened will now open in tabs across the top of the screen. This allows quick changing between boards. Tabs also remain in place between logins (e.g. if I have the Activity Log and Sign in/Sign out open and I log off those tabs will automatically be there when I login next). Last the Tabs alert you when new information has been put into a board, indicated by the  icon seen on the Activity Log.
- 4) **Toggle Boards:** If you have a lot of boards open, this drop down menu will allow you to toggle between them quickly.
- 5) **Home Screen Message Notification:** On your home tab you will see a notification when you receive a new message that will display the subject of the message.
- 6) **Pop-up Message Notification:** (Disclaimer: this will actually appear in the lower right hand side of your screen. It has been moved up simply for display purposes) When a new message is received you will see a blue bubble pop up with the message subject in the lower right hand side of your screen.
