1

The current record shows in the first row.

Display Complication or Severity – depending on condition

Combine Age and Age Type to display Age at Diagnosis

Combine Month Counted and Year Counted to display Mo Yr Counted

### II. Validate the following:

- The page displays as per web standards
- Paging will be available in the list grids to show five at a time and add paging when there are more than five rows of information. Keep the current sort order when paging.
- Sort list as follows:
  - o Archive Date (Desc)
- Sorting - When click a column header in a grid, check to see if the sort is currently on that column. If so, sort the list on that column ascending or descending (opposite of what it currently is). If not, sort the list on that column ascending. Dates sort include the month, day and year.

- e. When the user scrolls, save the position. When the screen reloads, use the latest scroll position to redisplay the screen in the same position as it was prior to the reload.
- f. Correct information displayed.
- g. Tab Order - The tab order should default as top to bottom left to right unless otherwise stated.

### III. Database routines – Screen Information
