Summer Food Service Program for Children

1. Situation: (Brief description of the current issue or situation requiring project/program.)

FY 2015 Summer Food Service Program for Children did not permit submission for reimbursement for inspection of school-based Summer Feeding Sites.

2. Background: (Relevant background data about current situation and current and past approaches to the situation)

Schools are required to have two inspections per year. One of the inspections is conducted during the Summer Feeding program time frame so at least we get reimbursement for one of them.

3. Assessment: (Your assessment about the situation and description of project or program that might address the situation.)

This is a change in policy from previous years. The impact this decision made on Madison County for FY2015 was a total of \$500. This does not sound like much, but in our small counties this is a budgetary impact for our Environmental Programs.

4. Recommendation/ Request : (policy, personnel, other resources needed to accomplish the project or program)

Please provide explanation to following questions:

- A. If the discontinuation of school based summer feeding sites as an eligible reimbursement is due to USDA regulation, are the school districts receiving additional funding for the required inspections?
- B. And if this discontinuation of school based summer feeding sites is not a USDA requirement, why did DHSS make this determination?
