

Top Eight MCH Priorities	NPM #	National Performance Measure (NPM)	National Outcome Measures <b>Associated with National Performance Measure</b>
1. Adequate insurance coverage	15	Adequate insurance coverage (Percent of children 0 through 17 who are adequately insured)	Percent of children without health insurance  Systems of care for children with special health care needs (Percent of children and youth with special health care needs (CYSHCN) receiving care in a well-functioning system)
2. Well woman care	1	Well woman care (Percent of women with a past year preventive visit)	Severe maternal morbidity per 10,000 delivery hospitalizations  Low birth weight rate (%)  Preterm birth rate (%)  Infant mortality per 1,000 live births  Perinatal mortality per 1,000 live births plus fetal deaths  Neonatal mortality per 1,000 live births  Preterm-related mortality per 1,000 live births
3. Household Smoking	14	Smoking during Pregnancy and Household Smoking (A. Percent of women who smoke during pregnancy and B. Percent of children who live in households where someone smokes)	Low birth weight rate (%) Preterm birth rate (%)  Infant mortality per 1,000 live births  Perinatal mortality per 1,000 live births plus fetal deaths  Neonatal mortality per 1,000 live births  Preterm-related mortality per 1,000 live births Post neonatal mortality per 1,000 live births Sleep-related  SUID mortality per 1,000 live births Severe maternal morbidity per 10,000 delivery hospitalizations Percent of children in excellent or very good health
4. Medical home	11	Medical home (Percent of children with and without special health care needs having a medical home)	Systems of care for children with special health care needs (Percent of children and youth with special health care needs (CYSHCN) receiving care in a well-functioning system)
5. Perinatal Regionalization	3	Perinatal regionalization (Percent of very low birth weight (VLBW) infants born in a hospital with a Level III+ Neonatal Intensive Care Unit (NICU))	Infant mortality per 1,000 live births  Perinatal mortality per 1,000 live births plus fetal deaths  Neonatal mortality per 1,000 live births  Preterm-related mortality per 1,000 live births
6. Child Safety/Injury	7	Child Injury (Rate of injury-related hospital admissions per population aged 0 through 19 years)	The child death rate per 100,000 children aged 1 through 9 Rate of death in adolescents age 10-19 per 100,000
7. Developmental Screening	6	Developmental screening (Percent of children, ages 9 through 71 months, receiving a developmental screening using a parent-completed screening tool)	Percent of children in excellent or very good health  Percent of children meeting the criteria developed for school readiness
8. Low risk cesarean deliveries	2	Low risk cesarean deliveries (Percent of cesarean deliveries among low-risk first births)	Severe maternal morbidity per 10,000 delivery hospitalizations  Maternal death rate per 100,000 live births
