

Announcing the New Heartland Center Learning Management System

The mission of Heartland Center for Learning Management (HCLM) is to “improve access to quality education and training programs for the current and future public health workforce to strengthen competence, performance, and capacity in order to enhance the nation’s public health system.”

The HCLM, in partnership with the Missouri Department of Health and Senior Services, is pleased to announce the launch of the new upgraded Learning Management System (LMS).

This new system provides a free, user-friendly platform for convenient access to a catalog of quality courses designed to meet the needs of public health, preparedness, and other workforce performing essential public health/community services. These programs and products are offered in a variety of formats, including e-Learning, self-paced training modules, certificate programs, archived webinars, and tool-kits. All course activity is tracked in a personalized transcript.
